

Figure 1: Kaplan-Meier survival plot showing time to death for two groups: EFS (blue line) and EFS + EFS (orange line). The x-axis represents Time (days) from 0 to 4000. The y-axis represents survival probability from 0.00 to 1.00. The EFS group shows a rapid decline in survival, reaching 0.00 by day 1000. The EFS + EFS group shows a more gradual decline, reaching 0.00 by day 3200. The plot includes a legend in the top right corner indicating EFS P = 0.984.
