

Figure 1 is a step function plot showing the probability of a system being in a particular state over time. The x-axis is labeled "Time (days)" and ranges from 0 to 4000. The y-axis ranges from 0.00 to 1.00. A blue line starts at 1.00 and drops to approximately 0.85 at day 1800. An orange line starts at 1.00 and drops to approximately 0.85 at day 1800. The text "OS P = 0.116" is displayed in the upper right area of the plot.
